

Machine Learning Engineer – AI Startup

We are seeking a Machine Learning Engineer with experience in deploying scalable AI applications.

Responsibilities:

- Build and deploy ML models using Python and TensorFlow
- Work with cloud infrastructure (AWS, Docker)
- Collaborate with software engineers on backend APIs

Requirements:

- Proficient in Python and machine learning frameworks
- Experience with cloud services like AWS
- Familiarity with NLP tools such as spaCy or Transformers
- Strong understanding of data structures and algorithms

Preferred:

- Experience with Kubernetes and REST APIs
- Background in software engineering and scalable systems
